

# Conservation and Community Exploration Camp

July 8 - 15, 2019

Daily Itinerary Program

## LEARNING ADVENTURES INSPIRED BY NATURE!

Green Camp is located at Green School, Bali, one of the greenest and most innovative campuses in the world. Set in this beautiful location, we offer programs for children, families, school groups, and corporation with a range of fun activities that challenges campers physically, intellectually and emotionally.

Our “wall-less” campus is surrounded by educational gardens, shaded outdoor learning areas, a workshop space made entirely out of bamboos and an outdoor field – you’ve never seen a place like this!

Designed by experienced facilitators, our activities will cultivate survival skills, develop sustainability knowledge and awareness, and empower individuals – all this while having a blast!

# 4 Pillars of learning

## Sustainability Education

We feel that the essence of Sustainability Education is to guide children to tap into their innate capacity for systems thinking. Our learning environment is designed to cultivate in campers the understanding that everything is connected and our actions on this planet have consequences. Campers learn to be mindful of the impact of their actions on the natural environment and each other. The UN Sustainable Development Goals underpin the camp curriculum as a unifying framework for enhancing understanding of sustainability challenges, and to help us be more responsible global citizens.

## Intercultural Appreciation

We believe that the diversity of cultures in our communities should be deeply respected and understood. Bali offers a vast richness of culture and traditions which are integrated into Green Camp learning experiences. Diversity at the camp is celebrated, and the mutual exchange of ideas is encouraged. Relationships are built and strengthened as campers play and learn alongside each other.

## Personal and Social Development

Navigating the inner world can be more challenging and confusing than getting lost and finding your way out of a dense forest jungle. Through a range of experiences campers are able to develop a deeper understanding of themselves and others. Campers have the opportunity to evolve their interpersonal skills and are challenged to move beyond their comfort zone. We offer the opportunity for campers to be engaged in collaborative experiences, learning to learn, live, work and play positively together.

## Nature-Based Learning

Full immersion in nature, with blurred lines between indoor and outdoor spaces, allows campers to fully experience their place in the natural world's rich biodiversity. It is through this connection that campers learn to care deeply about the world around them and become stewards for our planet. Natural and sustainable materials are used in experiences, allowing for exploration and supporting hands-on learning. The Green Camp experience offers a context for campers to 'rewild' themselves; remembering what we always knew about our connection with nature but have forgotten.

## Accommodation

### Yurt

Experience living in nature at our eco-rustic site! Families and children who choose our overnight programs will enjoy our Yurt Village located on the west side of our campus. The yurts are eco-rustic bamboo rooms filled with bamboo bunk beds that sleep up to 4 people.

- Built out of thatch roofs.
- Weather-resistant canvas.
- Comfy bamboo bunk beds, blankets, towels.
- Cooled by a ceiling fan.
- Mosquito nets.
- Surrounded by organic gardens.
- Outdoor private enclosed showers and composting toilets.

### Lodge

Lodge's 2 floors are split into female and male room

- Comfy bamboo bunk beds, blankets, towels.
- Best suited for large school groups.
- Common area inside the Lodge.
- Cooled by ceiling fans.
- Mosquito nets.
- Individual lockers.
- Bathrooms and showers located just outside of the Lodge.
